

Make tracks with the Novus Spectra.

Most luxury car models have their more economical counterparts, which offer similar amenities at a significantly reduced price. Introducing the Novus Spectra, the world's most powerful, single-color, compact photocoagulator from Lumenis.

Designed for general ophthalmologists and professionals who may use lasers more sparingly, the portable Novus Spectra offers the widest range of power for a variety of applications, making it an excellent shared device. Its SureSpot™ optics provide sharp, evenly distributed power on the retina,

while maintaining low power on the cornea and lens. And its foot switch lets you “floor it” hands-free.

If you're looking for an affordable laser with some real horsepower, then you owe it to yourself to check out the Novus Spectra. Take it for a test drive today.
