**One Laser. Endless Applications. Endless Benefits.**

Don't Gamble Your Budget on Sub-par Surgical Equipment

## Equip Your O.R. with the Finest Surgical CO<sub>2</sub> Laser Available – the One-of-a-Kind UltraPulse SurgiTouch

Whether you're looking to purchase new O.R. equipment in 2004 or planning for 2005, you owe it to yourself to explore how the UltraPulse SurgiTouch laser system from Lumenis can simplify many ENT, GYN, neuro, aesthetic and general surgical procedures. It's a sure bet!

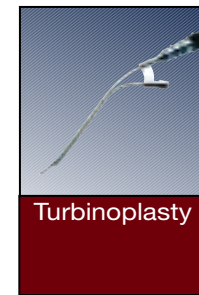

The UltraPulse SurgiTouch is the gold standard of precision surgical lasers. No other CO<sub>2</sub> system offers the UltraPulse's versatility, ease-of-use and range of clinical applications. Its menu-driven touch-screen interface lets you choose from a variety of pre-set procedures by specialty and application. Treatment parameters are then automatically selected.

Accessories include more than 60 delivery attachments – available as options – that deliver a broad choice of spot sizes and working distances. Many are compatible with a variety of microscopes and colposcopes, and all dispense a char-free pulse energy source that can be used for incision, excision, ablation, vaporization or coagulation.

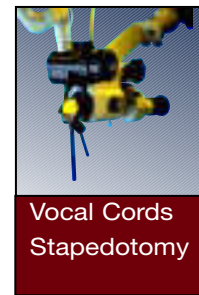

Laser-based procedures deliver quicker recovery times and faster healing than conventional surgery, and the UltraPulse SurgiTouch delivers these benefits in rolling sixes!

Septal Spurs  
Snoring  
Tonsillectomy

Turbinoplasty

Vocal Cords  
Stapedotomy

Myringotomy

Laparoscopy

Colposcopy

Aesthetics /  
Dermatology

**Focus on the Surgery – Not the Set-Up**
